

Homemade Slushies

Going to the movies might be on hold for now the summer, but you can make this classic frozen treat at home with just a few household items. Here's everything you need:

Supplies:

- 6 cups of ice
- 2 cups of water
- ½ cup of sugar
- Your blender
- Cups and straws for serving
- 1 drink mix packet (choose cherry or blue raspberry to make it taste like the kind you get at the movies)

Instructions:

1. Have your kids add each ingredient into the blender (with adult supervision, of course).
2. Once they've combined everything, blend the ingredients until the ice is the consistency of a slushie (it should still have small chunks of ice in it). Be careful about over blending, so your slushie mix doesn't become watery.
3. Pour your slushie mix into cups and enjoy while watching a movie and munching on popcorn together.

(P.S. Grownups feel free to add your own special ingredient to make it a bit more fun for you!)
