

# Make Your Own DIY MICROSCOPE

## Supplies:

● Plastic Cup

● Water

● Plastic Wrap

● Rubber Bands

● Scissors

Treasures from your nature hunt

## Instructions:

Cut a wide hole on the side of your cup, near the bottom. Adult supervision is required when using scissors!

Place plastic wrap over the top of the cup, and secure it with a rubber band.

Place your first specimen into the cup through the hole in the side.

Place a small amount of water into the clingwrap. Look through the pool of water at your specimen. This is nature, up close and personal!
